

ANKE collaboration meeting 2004: Preliminary agenda

9:00 – 9:30 Welcome (H.S.) and report of the spokesperson (M.B.)

9:30 – 12:00 Status and achievements (moderator: M.Büscher)

M.Nekipelov: K^+ production in the medium (15')

V.Kleber: Scalar mesons at ANKE (15')

Y.Maeda: ϕ -meson production (15')

S.Yashenko: Deuteron breakup (15')

S.Barsov: ω production in pn interactions (15')

N.Lang: η production in pn interactions (15')

A.Wronska: $dd \rightarrow \alpha\eta$ (15')

A.Kacharava: pn charge exchange (15')

K.Grigoriev: Results of cell tests (15')

V.Koptev: The Θ^+ at ANKE? (15')

12:15 – 13:30 Lunch

13:30 – 15:00 New Proposals (M.Büscher)

15:15 – 16:30 Technical issues (R.Schleichert:)

Start counters

HV

New MWPC's

Extension/replacement of FD

Vacuum system

Modifications for cluster target

Installation of PIT

Trigger & DAQ developments

Spectator counters

16:30 – 17:00 Software development (V.Hejny)

17:00 - 18:30 Organisational issues, planning and personnel (H.Ströher)

Collaboration list, new members

Priorities for future physics program

Technical modifications, e.g. polarized target

ANKE workshops, conferences, important dates

Spokesperson, technical coordinator

19:00 - ? Get-together with beer & ...
