

### ANKE proposals 1998-2003

| #    | PAC | Topic                                | requested | granted  |
|------|-----|--------------------------------------|-----------|----------|
| 38.1 | 15  | Commissioning & calibration          | 2         | 1 ½      |
| .2   | 21  | pp → pnπ <sup>+</sup>                | 1         | -        |
| 18.1 | 15  | pA → K <sup>+</sup> X                | 2         | 2        |
| .2   | 17  |                                      | 3         | 3        |
| .3   | 19  |                                      | 3         | 2        |
| 70.1 | 22  |                                      | 2         | 1        |
| 112  | 25  | pA → K <sup>+</sup> p/dX             | 4         | 3        |
| 75.1 | 17  | Measurements with cluster target     | 1         | 1        |
| 20.2 | 19  | d breakup                            | 3         | 1        |
| .3   | 20  |                                      | 2         | 1        |
| .4   | 21  |                                      | 2         | -        |
| .5   | 22  |                                      | 3         | 2        |
| .6   | 25  |                                      | 2         | 2        |
| 55.1 | 20  | pp → da <sub>0</sub> <sup>+</sup>    | 2         | 2        |
| .2   | 23  |                                      | 3         | 3        |
| 97   | 22  | pn → da <sub>0</sub> /f <sub>0</sub> | 3         | 3        |
| 75.2 | 20  | pd → dωp <sub>sp</sub>               | 1         | 1        |
| .3   | 21  |                                      | 1         | 1        |
| 114  | 25  |                                      | 1 ½       | 2        |
| 94   | 21  | pd → dηp <sub>sp</sub>               | 2         | 2        |
| 104  | 23  | pp → ppφ                             | 4         | 4        |
| 107  | 24  | dd → αη                              | 2         | 2        |
| 121  | 26  | Dibaryons                            | 1         | -        |
| 125  | 26  | Charge exchange                      | 2         | few days |
| 130  | 26  | Θ <sup>+</sup>                       | 1         | 1        |
|      |     |                                      | 53 ½      | 41       |
